PROFILE

How I think about product design:

I design products people come back to. I lead the work from the problem through a polished interface. I raise the quality of the people around me. Visual craft is part of the product. I use AI to prototype. I have put AI in the product where a person still decides.

SKILLS

Consumer product design
Retention and habit loops
Visual craft
Interaction design
Design systems
End-to-end product ownership
Coaching and critique
Team player
AI-assisted prototyping
Figma (prototype, handoff)
Engineering partnership
Web and mobile

EDUCATION

BFA, Graphic Design
Brigham Young University–
Idaho
2017

WORK EXPERIENCE

Entrata

July 2019 – 2026

Senior Product Designer · Product Lead (~1 year)

Property-management software used by apartment staff and residents.

- Product Lead for about 1 year with an owned engineering team, from the problem through ship.
- Simplified Homebody, a resident-facing mobile app. After launch, 4.4/5 on iOS from 600+ reviews in the first 6 months.
- Redesigned a complex setup system so one offer could carry multiple targeted incentives, inside the existing design system, after usability testing showed staff already used that pattern as the map. After launch, 8,290 specials used the new targeting rules.
- Led a team that designed an AI flow to read income documents and autofill a long certification, so the application became an upload a person could still review. Hundreds of teams entered. We won Most Likely to Land a New Logo.
- Designed a field mobile experience around looking up a person and taking the next action, so the app earned daily use instead of a mandate to download it.

FamilySearch

2017 – 2019

UX Designer

- Led product design of 26 personalized discovery experiences. Each one started from a named person and one next action, so a beginner had a reason to come back. Retention rose 95% for members and 107% for other users versus the prior year, with 90% positive feedback from 86,000 comments.
- Set that loop as the standard and guided outside designers so the volume stayed one product, with the same visual system.
- Tightened how the product team worked so we moved faster, did more thorough work, and ran into fewer surprises.
