PROFILE

How I think about product design:

I design products people come back to. I turn complex, high-stakes information into a clear next step, working from research and production data through interaction design, visual craft, and engineering delivery. Web and mobile. As the only designer or through a team.

SKILLS

End-to-end product design
Simplifying complex information
Field and user research
Interaction design
Visual craft
Design systems
Web and mobile
Retention and habit loops
Figma (prototype, handoff)
Production data
AI-assisted delivery
Cursor · Expo · SwiftUI

EDUCATION

BFA, Graphic Design
Brigham Young University–
Idaho
2017

WORK EXPERIENCE

Entrata

July 2019 – 2026

Senior Product Designer · Product Lead (~1 year)

- Dedicated designer for Greystar, one of the largest U.S. multifamily operators.
- Product Lead for about 1 year with an owned engineering team, from research through ship.
- Simplified core workflows for Homebody, a resident-facing self-serve mobile app. After launch, 4.4/5 on iOS from 600+ reviews in the first 6 months.
- Led a team that designed and built an AI flow to read income documents and autofill affordable-housing certification, so a long, high-pressure application became an upload. Hundreds of teams entered. We won Most Likely to Land a New Logo.
- Redesigned a complex enterprise setup system so one offer could carry multiple targeted incentives, adding flexibility without adding complexity. After launch, 8,290 specials used the new targeting rules.
- Designed a field mobile experience that put daily on-site information on the phone, so people could act in the moment instead of finishing later at a desk.
- Designed a mobile workflow that turned a two-part data-entry process into a real-time check-in, cutting the work of moving someone in by more than half. Handed to the iOS team as SwiftUI.

FamilySearch

2017 – 2019

UX Designer

- Led product design of 26 personalized discovery experiences that made a named ancestor real before asking anyone to search. Each one was an entry point and a reason to come back.
- Those campaigns retained 95% more members and 107% more other users than the previous year, reached 1.1 million people outside the US, and earned 90% positive feedback from 86,000 comments.
- Oversaw third-party design so each campaign used the same tried-and-true loop: a true hook from data we already had, relationship in a sentence, one next action.
- Refined how the product team worked so we moved faster, did more thorough work, and ran into fewer surprises.
